

2021 Survey
General Review

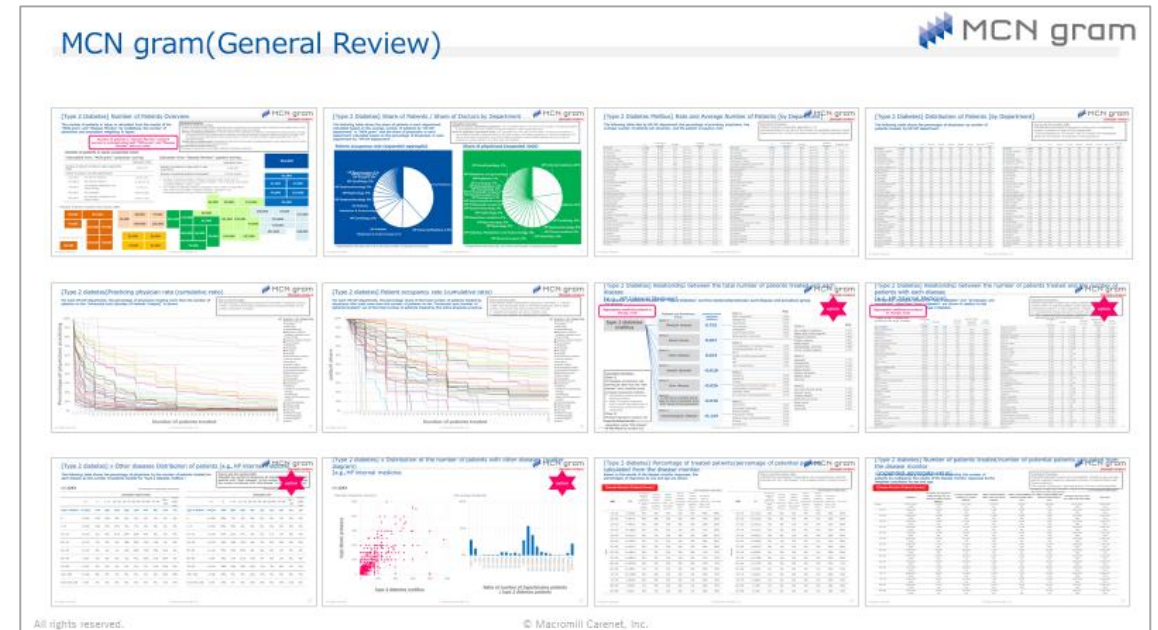

Overview of MCN gram

- The number of patients treated with disease and procedure/surgery (number of cases performed) were obtained from physicians across Japan: 173 target diseases and 24 types of procedures/surgeries.
- The data can be used to understand the facts of medical care in Japan, including share of number of patients by prefecture (weighted tabulation), share of number of physicians and patients among physicians who treat a certain number of patients, using the distribution data on the number of patients.
- ※ Disease-specific documents will be charged for (sample documents for "Type 2 Diabetes" and "Ulcerative Colitis" are available for download).

Sample

Paid

See samples (type 2 diabetes, ulcerative colitis) for details.

Name of database	MCN gram
Overview	The number of patients treated with disease and procedure/surgery (number of cases performed) were obtained from physicians across Japan: 173 target diseases and 24 types of procedures/surgeries.
Research method	Web survey
Geographic area	Across Japan
Target population	Physicians of all specialties
Number of responding physicians	15,455 physicians (HP: 12,481, GP: : 2,947) *HP: facilities with ≥ 20 beds, GP: facilities with ≤ 19 beds.
Research panel	CareNet.com member physicians
Survey date	Monday, June 21 - Friday, July 9, 2021
Survey administrator	Macromill Carenet, Inc.
Contents of survey	<ul style="list-style-type: none">• Total number of patients treated• Number of patients treated• Number of procedures and surgeries performed• Physicians' attitudes (what physicians want to achieve in the future)• Medical specialty qualifications• Attributes (e.g., age, facility location)

List of Diseases and Procedures

Total number of patients per month	pts/month
------------------------------------	-----------

Cardiovascular diseases	
Hypertension	pts/month
Obesity	pts/month
Hypercholesterolemia	pts/month
Chronic heart failure (CHF)	pts/month
Acute heart failure	pts/year
Idiopathic dilated cardiomyopathy	pts/year
CAD (MI/angina)	pts/month
Cardiac arrhythmia	pts/month
Atrial fibrillation (AF)	pts/month
Ventricular arrhythmia	pts/3 months
Cerebral infarction	pts/3 months
Pulmonary arterial hypertension (PAH)	pts/3 months
Arteriosclerosis obliterans (ASO)	pts/3 months
Cardiac amyloidosis	pts/year
Gastrointestinal diseases	
Reflux esophagitis	pts/month
Irritable bowel syndrome	pts/month
Constipation	pts/month
Non-alcoholic steatohepatitis (NASH)	pts/month
Hepatitis B	pts/3 months
Hepatitis C	pts/3 months
Cirrhosis	pts/3 months
Compensated cirrhosis due to hepatitis C virus	pts/year

Percentage of Practicing Physicians [(HP Internal Medicine Sample)].

The percentage of physicians treating equal to or more than the number of patients on the "horizontal axis (number of patients treated)" is shown for each disease/procedure.

n=1243

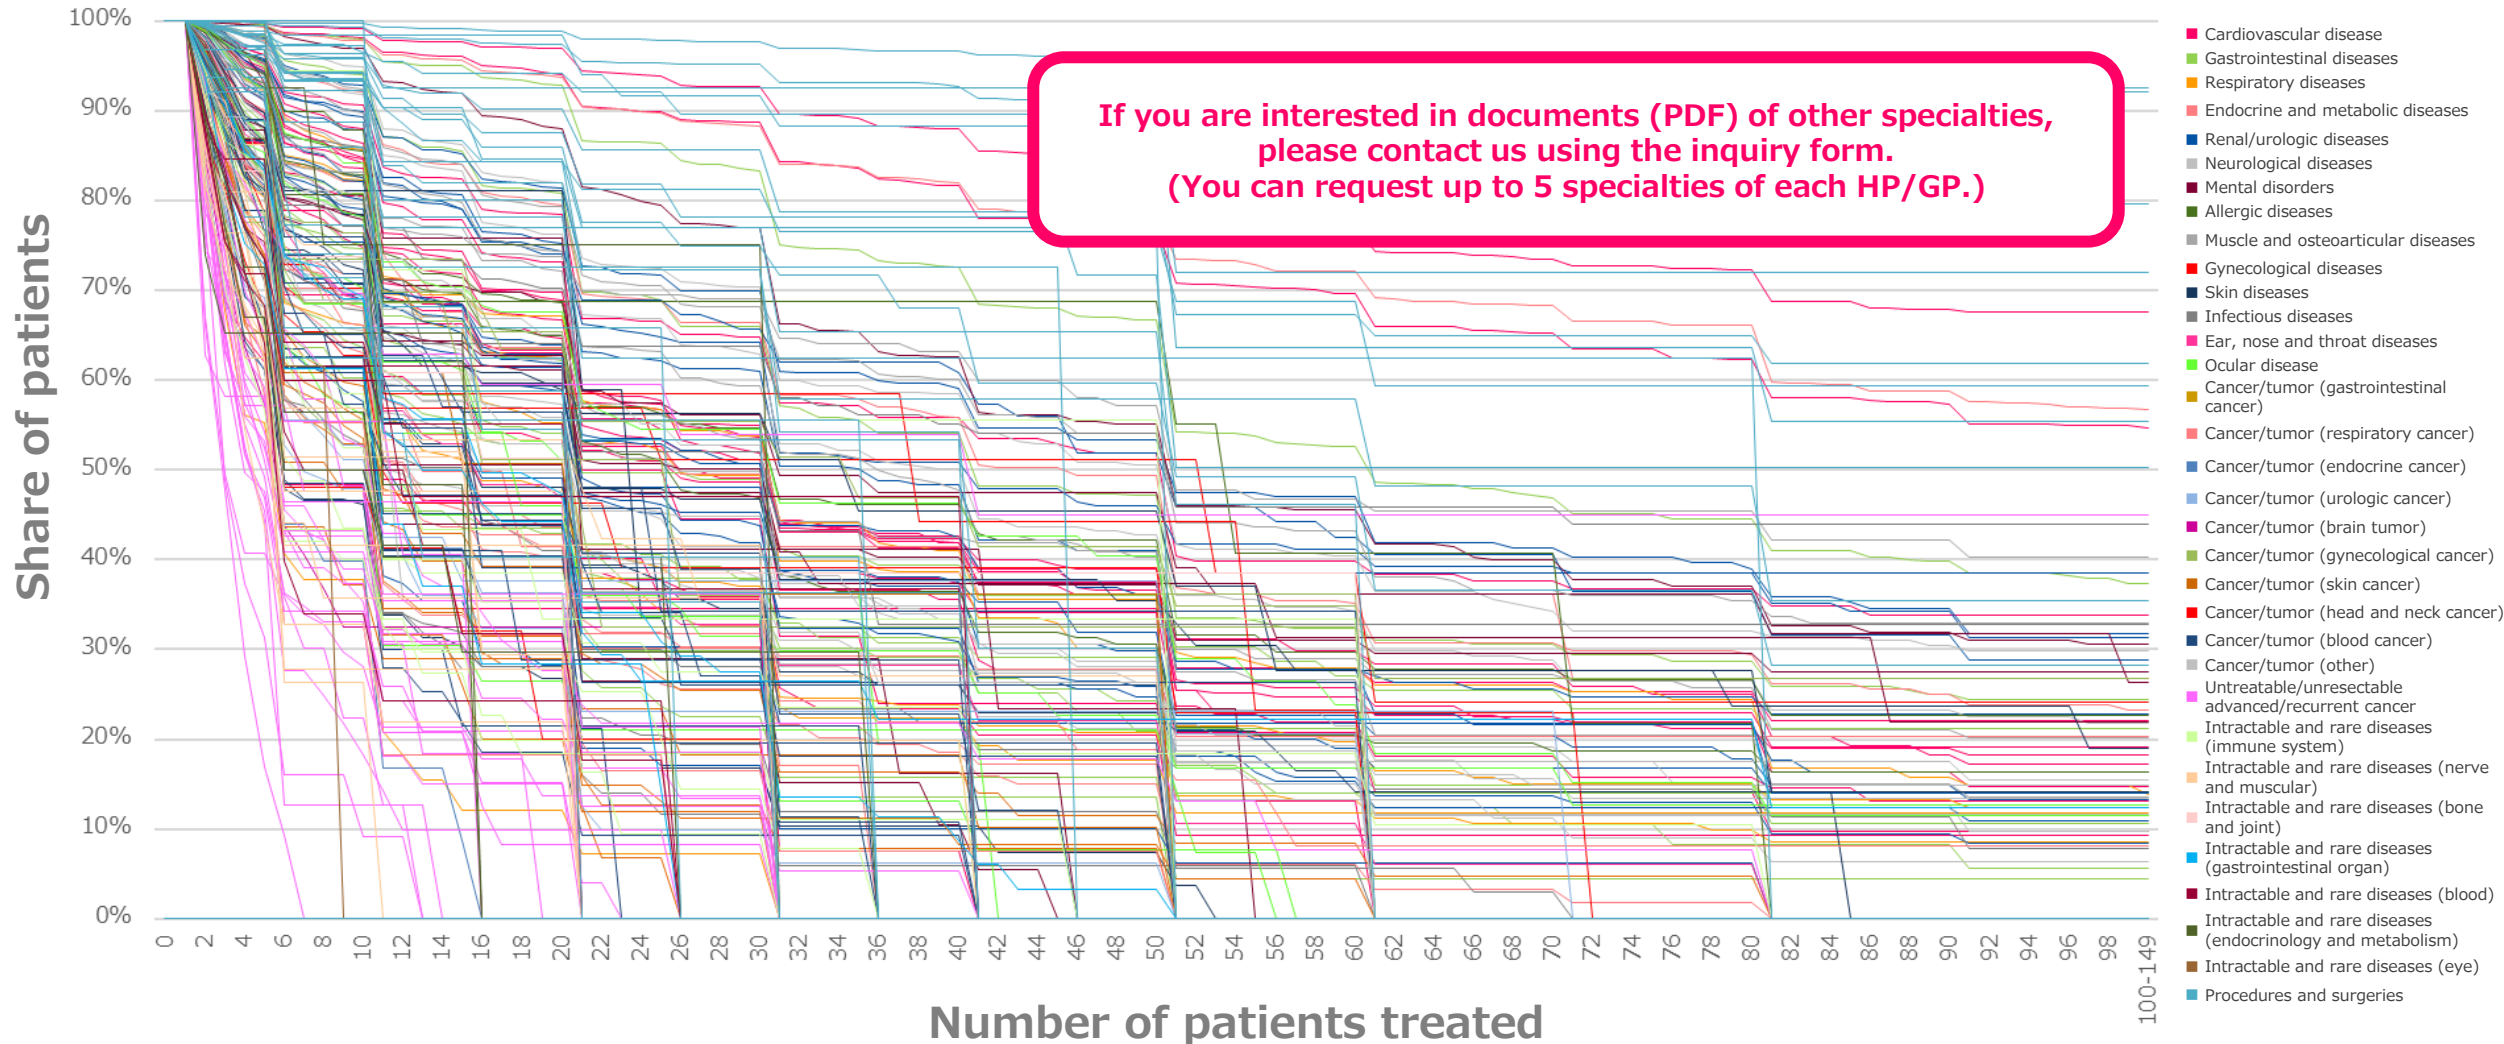

Share of Number of Patients [(HP Internal Medicine Sample]

Regarding diseases and procedures, the chart shows the share of the total number of patients treated by physicians who treat equal to or more than the number of patients on the "horizontal axis (number of patients treated)" out of the total number of patients treated by all physicians.
n=1243

What the graph represents:

The percentage of physicians treating "equal to or more than 1" patient is set as "100%," and the share of the number of patients gradually decreases if it is limited to physicians treating a large number of patients.

- ※ Legends and graphs are color-coded by area.
- ※ Graphs are prepared by disease and procedure.

Physician Type (Cluster Analysis)

The following table shows the types of physicians categorized by principal component analysis and cluster analysis based on the responses to the question on “physicians’ attitudes.”

Calculation procedure

After categorizing the results of the physicians' responses to each item using principal component analysis, the physicians were categorized into seven types using cluster analysis (K-means method) based on the principal components.

※ Responses used for categorization: n=12839 (excluding physicians responding to all items, etc.)

※ Cluster analysis was conducted using up to the 7th principal component.

Categorization of attitudes by principal component analysis (principal component score)

n=12839	1st Principal Component	2nd Principal Component	3rd Principal Component	4th Principal Component	5th Principal Component	6th Principal Component	7th Principal Component
I am more interested in research than clinical work.	0.866	-0.132	0.067	-0.090	-0.028	0.018	0.100

I have opportunities to make presentations at conferences and write papers.	0.518	0.097	0.134	0.381	-0.132	-0.085	-0.053
I try to read technical books and literature as much as possible.	0.483	0.227	-0.057	0.094	-0.045	0.229	-0.163
I am more attracted to prestige and status than money.	0.462	-0.144	0.379	-0.053	0.105	-0.039	0.213
I have several reliable sources of information and trust their medical information.	0.369	0.165	-0.141	0.003	0.089	0.085	0.003
I try to have many opportunities to talk with medical staff about practice.	0.053	0.869	-0.079	0.005	0.090	-0.109	0.046
I believe that medical care is a team effort, not a solo effort by a physician.	-0.103	0.866	-0.007	-0.012	-0.062	-0.044	0.039
I respect the medical staff I work with as professionals.	0.021	0.861	-0.014	-0.049	0.004	-0.081	0.038
I want to be highly regarded among physicians.	0.019	-0.066	0.800	0.147	-0.049	-0.026	0.012
I want to be recognized by patients and the public as a medical specialist.	0.206	0.024	0.758	-0.106	-0.071	0.014	0.010
I want to be a leader of other doctors.	0.258	-0.048	0.682	0.103	-0.040	-0.068	-0.016
I want to be trusted and respected by patients.	-0.127	0.072	0.491	-0.144	0.507	0.007	-0.048
I want to be successful also in business management.	-0.300	0.016	0.332	-0.030	-0.009	0.050	0.046
I attend manufacturer-sponsored/co-sponsored lectures as much as time permits.	-0.080	-0.125	-0.056	0.888	0.041	-0.022	0.049
I attend conferences as much as time permits.	0.228	-0.014	0.000	0.699	0.066	-0.018	-0.044
It is better to have interactions with other doctors or specialists in my community.	-0.208	0.127	0.211	0.658	-0.002	0.051	0.049
I try to be as frank as possible with my patients.	-0.042	-0.058	-0.042	0.031	0.734	0.001	0.099
I treat patients comprehensively, including in areas outside my specialty.	0.016	0.010	-0.243	0.103	0.716	0.065	-0.054
Patient's happiness is my first priority.	-0.041	0.206	0.123	-0.054	0.555	0.045	-0.064
I pursue the perfect treatment.	0.044	-0.065	0.128	0.183	0.372	-0.015	-0.036
I often do some research on the Internet and in books and other sources rather than asking people.	0.166	-0.239	-0.089	-0.104	0.086	0.799	-0.070
I tend to use new products, not only drugs, after a certain period of time and evaluation.	-0.025	-0.044	-0.081	0.044	0.007	0.793	0.240
I feel safer if the information provided is detailed and well written.	-0.053	0.048	0.095	0.090	-0.004	0.533	-0.067
Sufficient information is often a requirement in decision making.	0.117	0.213	0.187	-0.102	-0.080	0.340	-0.171
I often judge things based on my feelings, such as likes/dislikes.	0.008	-0.086	0.037	0.014	-0.045	0.063	0.820
I tend to do things intuitively.	0.026	0.135	0.012	0.037	0.046	0.004	0.817
I do not care about details.	0.213	0.207	-0.099	-0.030	0.078	0.000	0.448
I want to use a new drug even with a little general recognition of its efficacy and safety.	-0.067	-0.050	0.036	-0.001	-0.049	-0.114	-0.001
I want information before others, even with incomplete information.	0.174	-0.176	-0.030	-0.029	0.118	-0.157	0.135
I think it is important to have not only evidence but also opinions and impressions of people involved.	-0.207	0.041	0.063	0.105	-0.074	0.297	0.122
It is in my nature to do everything according to the rules.	-0.066	0.154	0.024	-0.052	-0.112	0.006	0.159

Categorization of physicians by cluster analysis

- 1st principal component : Research and medical science oriented
- 2nd principal component : Team care oriented
- 3rd principal component : KOL oriented
- 4th principal component : Conference/lecture oriented
- 5th principal component : Patient-centered oriented
- 6th principal component : Information collection oriented
- 7th principal component : Intuition oriented

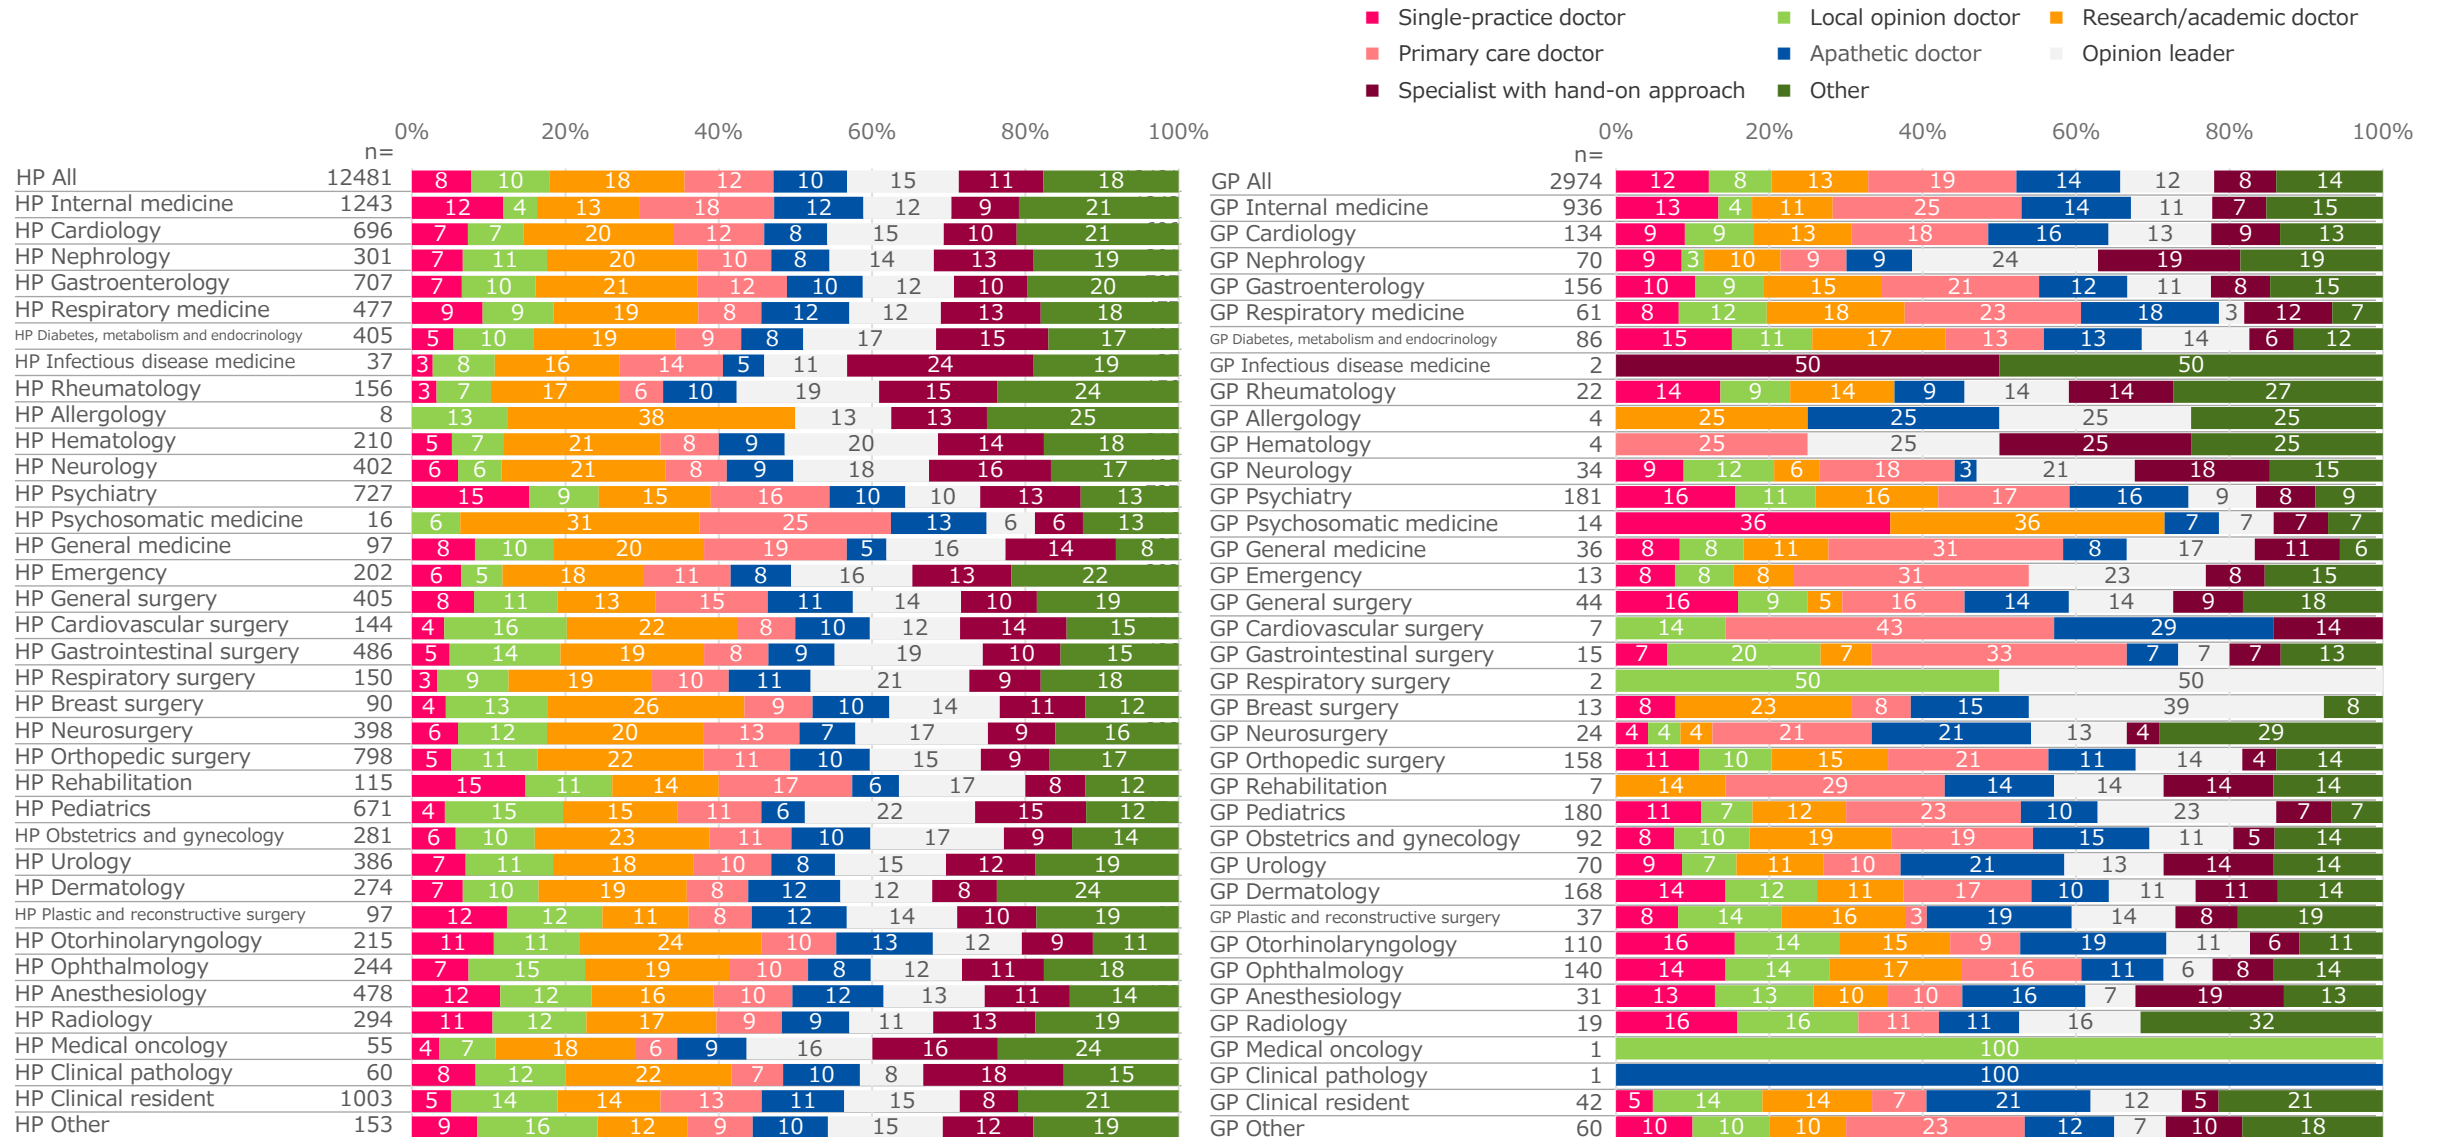

Physician Type 1 Physician Type 2 Physician Type 3 Physician Type 4 Physician Type 5 Physician Type 6 Physician Type 7

Physician Type 1	Single-practice doctor
Physician Type 2	Local opinion doctor
Physician Type 3	Research/academic doctor
Physician Type 4	Primary care doctor
Physician Type 5	Apathetic doctor
Physician Type 6	Opinion leader
Physician Type 7	Specialist with hands-on approach

Physician Type [by HP/GP Specialty]

The percentage of physicians are shown by physician type categorized based on the results of responses to the questions on "physicians' attitudes" by HP/GP specialty.

	Data content	Price
Cross tabulation table <ul style="list-style-type: none"> Excel 	The following documents on all diseases and procedures/surgeries (approx. 200 types) by HP/GP specialty <ul style="list-style-type: none"> Distribution of number of patients (crosstabulation table) Percentage of practicing physicians, average number of patients, standard deviation 	※ Please contact us.
Basic package (Disease summary) <ul style="list-style-type: none"> PDF document Tabulation data (Excel) 	<ul style="list-style-type: none"> Summary of number of patients (weighted number of patients in Japan, number of patients by prefecture) Share of number of patients/physicians in specialty Percentage of practicing physicians and average number of patients [by specialty] Distribution of number of patients [by specialty] Percentage of practicing physicians (cumulative ratio) Share of patients (cumulative ratio) A1. Relationship between total number of patients treated and disease A2. Relationship between number of patients treated and number of patients with disease B1. Target disease x other diseases: Distribution of number of patients B2. Target disease x other diseases: Distribution of number of patients (scatter diagram) <p>Listed as an appendix for a survey using both "MCN gram" and "Disease Monitor" data</p> <p>Disease Monitor (patient survey) data by age group</p> <ul style="list-style-type: none"> Percentage of treated/potential patients calculated from the disease monitor Number of treated/potential patients calculated from the disease monitor (weighted tabulation) 	※ Please contact us. ※ The basic package includes one pattern of each "A" and "B." ※ Please contact us if you require only some of the basic data.
Optional documents <ul style="list-style-type: none"> PDF document Tabulation data (Excel) 	A1. Relationship between total number of patients treated and disease A2. Relationship between number of patients treated and number of patients with disease B1. Target disease x other diseases: Distribution of number of patients B2. Target disease x other diseases: Distribution of number of patients (scatter diagram)	※ We will provide an estimate based on the number of processes. Document unit A: 1 pattern B: 5 patterns (target disease x 5 diseases)
Raw data <ul style="list-style-type: none"> Excel 	<ul style="list-style-type: none"> Total number of patients treated and number of patients with target disease Physician type (cluster analysis) Attributes (specialty, management type, number of beds, specialists, age, facility location) 	※ Please contact us.
